### DETAILED ACTION

1. Applicants' amendment of 11/01/07 has been fully considered in preparing this Office Action.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1, 3-6, 8-10, 11, 13-16 and 18-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 1 requires a computer implemented method. The specification includes a computer program as the method. Computer programs are non-statutory.

Claim 11 requires a computer program product tangibly stored on a computer-readable medium. The specification includes a computer program as the product. Computer programs are non-statutory.

4. Newly amended and submitted claims 1, 3-6, 8-11, 13-16, and 18-25 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: In the original claims, the requirement was: "the parameter values being associated with time values independent of position along the stroke path" (claim 1). The amended claim 1 requires "associating the position values

with a first set of the time values and respective stroke parameter values occurring in the time period". Since the amended claims recite an association among the position, parameters and time, in contrast to the original requirement of independence of position, the claims are now independent or distinct from the originally presented claims.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 1, 3-6, 8-11, 13-16 and 18-25 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.
